

Hygi.

Unique. Layered. Recoverable.

22 five-minute digital-hygiene lessons · digitalhygiene.app · Brought to you by NorthBridge

The problem

People don't lack security advice — they lack advice they'll finish, and much of the password advice still in circulation contradicts current federal guidance. Compliance training measures completion checkboxes, not comprehension.

The product

22 lessons across 7 themed pathways, each five minutes, each ending in a mini-quiz with an explainer for every answer and a badge. Finish all 22 for the Digital Hygiene Champion trophy. 73 quiz questions, a 78-term Digital Safety Glossary with tap-or-hover definitions, the interactive Five-Door Reset, and a scoped AI helper limited to course content.

What changed in the 2026 content refresh

- Protect Your Accounts rebuilt on NIST SP 800-63B-4: one lock per door, 15+ character passphrases, no composition rules, no calendar rotation.
- Passkeys taught first, with a tiered MFA ladder (passkey > security key > authenticator app > push > SMS) per CISA phishing-resistant MFA guidance.
- New Lock Down Account Access lesson covers recovery codes, active sessions, connected apps, SIM swap, and verification-code safety.
- Every lesson now carries an 'Evidence behind this lesson' panel citing the specific NIST, CISA, or university source.
- Glossary expanded with FIDO, WebAuthn, phishing-resistant authentication, SIM swap, MFA fatigue and more; the AI helper is blocked from repeating obsolete advice.

Sources

NIST SP 800-63B-4 (July 2025) · CISA Secure Our World, Implementing Phishing-Resistant MFA, and Project Upskill · Dartmouth College · Caltech IMSS · Cal Poly · Harvard T.H. Chan. Cited in-app; Hygi. is not affiliated with or endorsed by these institutions.

Measurement

Anonymous, opt-in instrumentation: install funnel, quiz completions by day and lesson, per-lesson pass-rate trends, most-missed questions, glossary taps, shares, trophies, and referring-domain attribution. Learner progress stays on the device.

The ask

Pilot Hygi. with one cohort this quarter — 25 to 100 people, four weeks. You get your guidance in Hygi.'s format plus a completion and pass-rate report. Setup is a link.
